Superintendent
Department of Wastewater

June 4, 2013

VIA HAND DELIVERED MAIL

Mr. Howard Imhof
Metalor Technologies
52 Gardner Street
Attleboro, MA 02703

Subject: Cease and Desist Order Metalor Technologies, Industrial User Permit No. 026

Attention: Mr. Imhof

On November 7, 2012 your company was issued a Compliance Order No. 12-1 which specifies a compliance time frame by April 30, 2013. Unfortunately even after the City extended your company's compliance date, Metalor still struggles to comply with the Order and continues to report delivery delays of their new equipment in their monthly submissions to the City. Metalor's latest submission dated May 30, 2013, (ARP Update 7) follows true with this pattern and has now pushed back their anticipated compliance date to July 15, 2013. The City has demonstrated on several occasions that Metalor's excessive discharge of TKN inhibits our ability to operate our nitrogen pilot plant and meet our NPDES Total Nitrogen limit.

Therefore, due to Metalor's inability to meet the Local Limit for Total Kjeldahl Nitrogen (TKN) as specified in Attachment A of the City of Attleboro's Sewer Use Ordinances, Metalor is hereby ordered as of July 1, 2013 to *Cease and Desist* their discharge to the City of Attleboro's Municipal Sewer System until such time that they can comply with the City's limit. Once your new treatment system is in place, please contact me and a meeting will be arranged.

If you have any questions, please contact me.

Sincerely,

Paul A. Kennedy
Superintendent of Wastewater
